

# GuestCall System

Turn waiting customers into happy customers and take the stress out of queues for your staff with our GuestCall system.

## Coaster System

- Coaster Paging transmitter/charger
- 10 - 30 Digital Coasters

## Slimline Pager System

- Slimline Paging transmitter/charger
- 15 x Slimline Paddle Pager

Even during those busy times businesses can not afford to lose customers or accept poor customer service. Our GuestCall systems allows customers to be paged when their order or table is ready and in the meantime they can happily take advantage of the bar, relax at their table or take a stroll knowing that they will not lose their place in the queue and that your company values them as a customer.

Our coasters and slim-line pagers flash and vibrate when activated, via the all-in-one transmitter charger units, alerting the customer to return to the counter for instant service. Our GuestCall systems will result in higher traffic and improved restaurant traffic flows leading to faster table turns and improved profitability for your restaurant.

Coasters can easily be reprogrammed and have their id displayed on an easy to read LCD display. Simply returning the coasters or slim-line pagers to the transmitter will keep them charged for hours of use.

## Features

- Digital display on coasters makes them easy to locate in any light condition
- Coaster numbers can be reprogrammed onsite
- Pagers can be set to audible, vibrate, flash or combination modes at any stage providing excellent flexibility to suit any situation
- Our "Smart Charging " eliminates over-charging and extends battery life
- Batteries can be easily replaced minimising ongoing costs of maintenance
- Unique base ID system ensures no overlapping with other restaurants
- Sleep Time options allows automatic turn on and off of all pagers
- Pager Out of Range alert helps prevent lost of pagers
