

TableCall System

Maximise sales and customer service through our TableCall System, which is specifically designed to assist guests obtain customer service when they want it.

TableCall System

- TableCall transmitters are available in any quantity, a maximum of fifteen units per charging base
- Watch pagers can monitor up to 100 tables
- Server call unit available with 12 or 24 individual server buttons

The convenient table top unit allows customers to page staff for service or the manager for assistance. Waiters and Managers are immediately alerted via our wrist pager which table number requires their assistance.

Staff can freely circulate looking after your customers knowing that they can respond immediately to your customer's requirements without having to needlessly hover.

Our TableCall system will provide enhanced customer service, increased sales, reduced staff numbers and quicker table turnaround.
