

CaféCall System

Ideal for clubs, bars and cafés; allowing the kitchen to immediately call waiting staff as soon as meals are ready to be served without noisy bells or alerts.

CaféCall System

- CaféCall comes with a charging base for transmitter and pagers for convenient overnight charging
- Pagers can provide vibrate, audible as well as LED flashing upon receipt of alert

Staff can freely circulate looking after your customers knowing that they will be immediately called when their meals are ready to be served.

This results in more effective customer service, more efficient staff, a reduction of waiting time in the kitchen for servers and customers receiving their meals hotter and faster.

Pagers vibrate silently on the hip of your servers providing seamless communication between the kitchen and front of house.

Features

- Powerful transmitter which is perfect for smaller restaurants and Cafés
- Transmitter repeaters available for larger restaurant if required
- Durable and sturdy enough to withstand industry conditions
- Pagers provide discreet effective communication to waiter staff
- Our "Smart Charging " eliminates over-charging and extends battery life
- Unique base ID system ensures no overlapping with other restaurants
